About Us

The Caster Guy is located in beautiful Green Bay Wisconsin. Our company has been in business since 1984 and The Caster Guy website began in 2009. We distribute casters, wheels, and related accessories all over the United States to homeowners as well as all business types. We sell via the web, phone, and to walk in customers.

The Caster Guy was created to ensure that potential customers from coast to coast are able to reap the same benefits that our local customers have enjoyed for years.

Our mission is to provide you with the best possible experience for your caster, wheel, or related accessory needs. This includes fast friendly service and competitive pricing.

As of July 1st, 2013 The Caster Guy became a division of Garland's Inc., and thus now has access to a full line of material handling products.

Established in Minneapolis, MN, 1944, Garland's has been distributing casters, wheels, shelving, and a wide variety of other material handling products for seventy years. Our strength of service and dedication has allowed our continued growth through the economic hardships of the eighties, and the more recent recession of the 2000's. Our stability has allowed us to expand into markets in Iowa, Colorado, and Wisconsin; giving us the ability to provide greater service to the Midwest.

As one of the top caster distributors in the nation, Garland's Inc. brings the needs of our customers directly to the caster industry's forefront. Being a long standing member of the National Caster Alliance, Garlands Inc. has cultivated close relationships with some of the most prestigious manufacturers in the caster industry. In addition to the thousands of other manufacturers we offer, we proudly represent the entire line of Colson products: Colson, Albion, Shepherd, MedCaster, Jarvis, Faultless, and Pemco.

Our commitment to customer service ensures Garland's is the team member for your business, and its fast paced changing landscape. All our locations have state of the art shipping and receiving departments offering same day shipping, and blind shipments; guaranteeing your customers will always be your customers.
Providing high quality products gives you the dependability and durable performance that you require, and deserve.

Garland's outside sales force provides efficient, concise, professional on-site assistance to meet your needs. Our sales representatives have years of hands-on experience turning unique issues into practical solutions. Your Garland's inside
coordinator is just a call away. Each inside salesperson is prepared to help you with specifications, pricing and delivery information.

We are committed to providing the highest caliber of service and quality products in our industry for our customers who rely on us for their material handling needs year after year.

Driving the Center Store: Centering on Profits

An effective display shelving system can reinvent this critical department.

Over the past two decades, grocers have driven significant innovation in their perimeter departments to remain competitive in the face of encroachment from a variety of retail channels. Indeed, enhanced bakery, deli, meat, and produce departments now feature added services and unique products aimed at such differentiation. According to Nielsen, this has driven more than 8 percent in perimeter sales growth in the grocery channel.

However, this is coming at a cost; the center store is experiencing declining sales on a same-store basis, according to Nielsen. Its recent Center Store Study stated that "management practices that are based on a product view of the market cause competition between similar products and categories. In fact, one can argue that the disproportionate investment in the perimeter can actually create a drag on total store sales and profits."

The result is the traditional center store has become vulnerable against value retail players; with the only key differentiator being price, shoppers are buying center store staples at mass merchandisers, drug chains, and dollar stores. For the grocery channel alone, this channel-blurring and consumer switching trend in the center store equated to $23 billion in lost opportunity over a 5-year period, Nielsen reports.

Innovations to the perimeter notwithstanding, the center store still remains a critical component of the grocery business, one that cannot be neglected.

"Our 2012 Grocery SuperStudy reveals that the Center Store accounts for 74 percent of total store sales and 66 percent of total store gross profit dollars," says Paul Weitzel, managing partner for retail consultancy Willard Bishop. "While much of the focus in recent years has been on the fresh and service departments where retailers feel they can differentiate, the Center Store continues to be the economic engine that makes a supermarket run. It provides the degrees of freedom to invest on the perimeter.

"Depending on the retailer, I've seen these contribution numbers even higher for Center Store. This part of the store should not be neglected and there is definitely an opportunity to put more attention towards the Center Store, create more excitement and create more loyalty."

What's more, Weitzel points out that "this can be done without over investing or taking away center store efficiencies."

Centering on Solutions

One solution to the challenge of reviving the center store shopping experience can be found in center store display shelving. Current center store display shelving systems typically found in grocery stores — generally called gondola shelving — use a design that hasn't significantly changed in more than 50 years. They consist of sheet metal panels that hide more products than they reveal, and are bulky and space-inefficient. Sheet metal gondola shelving, with supporting cross members, is typically 1 ½ inch thick, and relies on bulky, space-robbing brackets for support. In addition, the gondolas are supported on a platform that rises several inches from the floor. The sheer bulk of the sheet metal delivers questionable aesthetic value; moreover, it occupies valuable display space.

On top of this, gondolas are difficult to assemble and adjust, often requiring tools, and cleaning the dirt and dust that becomes trapped in the shelving's recesses is very labor-intensive.

Appearance-wise, center store gondolas generate no visual differentiation, as there is little versatility in how products are displayed. If a shopper were dropped in the middle of a grocer's center store aisle, they'd be hard-pressed to determine which grocer they were visiting — or even if it was a grocer at all, as other channels often have similar displays for their packaged items.

By simply addressing these challenges of space, versatility, aesthetics, and maintenance via an effective shelving system, grocers can transform their center store into an eye-catching and profit-making destination.

An effective shelving system should go beyond the mere holding of product; it should be a tool that quickly and easily adapts to a grocer's merchandising needs. To do this it must be space-efficient, versatile, and aesthetically appealing.

Space efficient: Ideal shelving systems should make the best use the space they occupy. Modern wire shelving systems, for example, start almost at ground level, and don't need cumbersome support brackets that sheet metal gondolas require. Because of this, they provide more storage space within the same footprint of traditional gondolas, often up to 30 percent more usable space. This translates to more SKUs on the shelf, and helps drive increased sales and profits.

Versatile: Shelving systems should adapt to merchandising changes and contemporary merchandising techniques. They should have the ability to change from stationary fixtures to mobile units by simply snapping on casters, which allow for cross merchandising capabilities or the highlighting of promotional items.

They should also easily accommodate components used for several merchandising options, such as peg boards, slat walls, and pushers, as well as new lighting concepts. This enables the retailer to vary the center

store landscape and highlight individual sections. In addition, switching from one merchandising concept to another should be intuitive, and require no tools, thereby reducing labor involved in resetting displays. Needless to say, they should be easy to clean.

Aesthetically Integrated: The ultimate goal of shelving should be to create a theater in which the products are the stars. The fixture should disappear into the background and augment the store's interior décor. Light should penetrate it from all angles to effectively highlight the design and packaging of products. The result is a wall of colorful products, with little obstruction.

Density=Opportunity: What would you do with 30 percent more space?

Metro's Drop Mat Display System satisfies each of the above components. It creates 30 percent more display space compared to traditional gondolas that occupy the same footprint. Here's why: Metro Drop Mat Shelves are only ¼-inch thick, compared to 1-1/2 inches of a traditional gondola shelf. The Drop Mat Display System eliminates the need for under-shelf supports and bulky shelf brackets, reclaiming 20 percent of merchandising space. It reclaims up

to 10 percent additional space by eliminating the 3 to 4 inch wide center support structure needed for gondolas. More importantly, this extra space enables grocers to enhance the center store with additional products that can differentiate the department and give shoppers a reason to stop.

A plan-o-gram display system impact analysis conducted by a third-party research firm analyzed the impact of replacing traditional gondola shelving with Metro's Drop Mat Display Shelving for the salty snacks and salad dressing categories, and revealed that the Metro shelving offered 30 percent more holding capacity. This extra space translates to $29,500 Incremental profit per store annually by replacing just 10 gondolas with Metro units.

In conclusion, the center store is under attack from multiple retail channels, yet this department is key to overall sales and profits. Effective display shelving systems can help grocers revitalize the center store by showcasing product more efficiently, more aesthetically, in more ways — with less labor. Metro's display shelving systems deliver all of this — and more. ▬

Grocers Speak

Debbie Dory, co-owner, Newport Avenue Market, Bend, Ore. and 2013 NGA Woman Retailer of the Year

"The DropMat qwikSLOT shelves are amazing. They are so quick and easy to adjust that it makes resets easy. We use them in a variety of configurations throughout the store because they enable us to make the most of our space. In fact, I was so impressed with the versatility of the system, I now use them in all the storage areas of my home, too!

"We use the antimicrobial Metro shelving in all of the store's foodservice areas. Since the antimicrobial technology is embedded throughout the shelf material, it keeps its germ-fighting properties even if it gets scratched by foodservice equipment.

"Metro has a shelving application for every situation we come across. They do a great job."

Frank Lundquist, VP of store development, Harmon's Grocery, Salt Lake City, Utah

"The challenge we faced with our City Creek store was how to get 70,000-square feet [of product] into 50,000-aquare feet of space. Metro's DropMat Display Shelving System enabled us to achieve this goal. In the peanut butter category, for example, we were able to add two additional shelves' worth of product

for each section of shelving compared to the traditional sheet metal gondolas. We're merchandising more products in the same space.

"The shelving system also gave the store more storage space. We build our shelves higher here than in typical grocery stores, because we use the upper shelves to store product, as we have no back room space here. That makes re-stocking quick, which helps when we do promotions. Associates just have to move the products from the upper shelves to the display shelf.

"The system is very versatile. You can put them on casters for mobile merchandising, you can slant them to better display product, you can even cut them down and incorporate signage to better tell your story. The wire shelves showcase product beautifully." ▬

Superior materials and design for every application.

Engineered for use and abuse.

Super Erecta
"The original wire storage and handling system"

qwikSLOT
"Add-a-Shelf, Remove-a-Shelf... Instantly"

Super Adjustable Super Erecta
"The easiest to adjust wire shelving system ever"

Robust Steel Corners · Reinforced Center Supports
Durable Finishes · Advanced Polymer Materials · Type 304 Stainless Steel
Easy-to-Adjust in Increments of 1" (25mm)

Strong to the Finish.

Shelving Finishes Guide

Wire & Solid

Type 304 Polished Stainless Steel
Addresses the most aggressive applications and environments. All-stainless solid and wire options exist for high temperature automated cart wash and autoclave applications.

NSF

Metroseal 3™ Epoxy
Corrosion resistant finish for wet or high humidity environments with a 12 year warranty against rust and corrosion. Microban antimicrobial is built into the finish to keep the product "cleaner between cleanings".

Microban
antimicrobial product protection

NSF
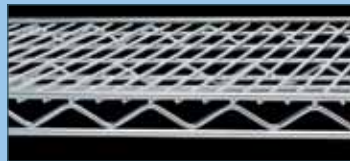

Chrome Plating
The "real" nickel-chrome finish for dry, low humidity environments. Metro's durable chrome finish includes a protective lacquer coat.

NSF

Brite
Economical, chromate finish for dry, low humidity environments. Metro's Brite finish provides the look of chrome and includes a protective lacquer coat.

NSF

Standard Epoxy and Designer Finishes
A pleasing aesthetic and basic protection for dry environments.

Shelving Post Guide

Standard Stationary Post with adjustable leveling foot. Stainless models also feature a stainless leveling foot. Use Foot Plates for greater stability.

Standard Stem Caster Mobile Post accepts a Metro stem caster. Use these for the majority of standard duty transport and movable storage applications.

Cart Wash and Autoclave Applications
Swaged stainless post has a fastened aluminum post cap and is specifically designed to withstand high temperatures. See page 50 for part numbers.

Heavy Duty Transport
Staked post attaches to a dolly truck to address abusive transport applications. The reinforced connection between the base receptacle and post provides a more secure connection to the dolly truck. See page 52 for part numbers.

METRO®

Wire Shelves — `10.01a` `10.10a`

Packaging: Wire shelves are priced individually and packaged no more than 4 per carton except 60" (1524mm) and 72" (1829mm) lengths and 30" (760mm) and 36" (914mm) widths, which are packaged no more than 2 per carton. Plastic sleeves and wedges are included with each shelf.

Post Boots with *Microban® Product Protection — 10.06

Patent Pending.

Seals out moisture and protects the post from corrosion in areas where floors are mopped regularly. Easily slips over the bottom 5" (127mm) of a stationary post. Built-in Microban antimicrobial. Use with standard leveling bolt or foot plates. Bags of 4.
Cat. No. **9982GR-4**

Foot Plates — 10.06

Use to bolt units to the floor, or when a broader, more stable foot is desired.
Zinc. Cat. No. **9993Z**
List Price 12.90 each
Stainless Steel.
Cat. No. **9993S**

Black. Cat. No. **9993BL**

Glides — 10.06

Smooth polymer cover fits over leveling bolt to protect floors.
Cat. No. **9991P**

Decorative Leveling Foot — 10.06

Decorative alternative for post. Compensates for uneven surfaces.
Chrome. Cat. No. **HDFC**

Black. Cat. No. **HDFB**

Post Clamps — 10.06

Joins units together for maximum strength.
Zinc-plated. Cat. No. **9994Z**
Black. Cat. No. **9994BL**

Aluminum Split Sleeves — 10.06

For high temperature, over the road, or conductive applications. Zinc or stainless steel retainer rings available to secure shelf. One bag required per shelf; 4 pairs per bag.

	Cat. No.
Aluminum Split Sleeves with Zinc Rings	**9986Z**
Aluminum Split Sleeves with Stainless Rings	**9986S**

Replacement Plastic Split Sleeves — 10.06

One bag required per shelf; 4 pairs per bag.

Black Split Sleeve   White Split Sleeve

	Cat. No.
Black Plastic Split Sleeves	**9985**
White Plastic Split Sleeves	**9985W**

Note: White post caps and white split sleeves are standard with white designer shelving only.

Replacement Super Adjustable Kit

Package includes 4 wedges, 4 sleeves, and 4 corner releases.
Cat. No. **SAKITA2**

Basket Shelf — 10.04

$3^{1}/_{2}$" (89mm) deep basket with 400 lb. (182kg) weight capacity. Ideal for containing and displaying smaller items.

Hydraulic pump is quality German design with a foot release pedal for ease of operation. The pump features a special lowering valve allowing a controlled rate of decent and an overload by-pass valve. The pump requires 10 strokes to raise the forks to the maximum lift.

The control handle features three positions (raise, neutral, and lower), fingertip control, ergonomically designed and free of pinch points. The handle features reinforced base, the spring loaded handle returns to the upright position automatically.

Load rollers feature 2.9" polyurethane load rollers with sealed bearings. Adjustable push rods allow for individual adjustment capability of either fork height. The one-piece hangers are constructed of steel for greater strength and longevity. Features helper rollers for ease of entry and exit of pallets. The Eagle55 features grease fittings and bushings at all pivot points for easy maintenance and longevity.

Light Medium Duty

Capacity ratings are up to 350lb per caster.

One of our most popular types of plate casters are the light-medium duty 1-1/4" wide wheel casters. They are available in a wide variety of wheel diameters and wheel types to accommodate your specific needs.

They come with a standard zinc plated caster housing, two rows of ball bearings in the swivel section and all swivels are available with a brake option. The swivel casters come standard with a zinc plated dust shield that helps to protect the swivel section where the ball bearings are housed from debris and dust for longer life of the caster. Some wheel types also come with a full or partial thread guard on each side of the wheel to reduce debris from wrapping around the axle or entering the bearings in the wheel.

Product will usually ship within 24-48 hours, depending on quantity.

Policies

Privacy
The Caster Guy does not share your information with anyone. We are dedicated to your privacy. We do from time to time use tools to analyze our customer's movement within our site to maximize our advertising efforts.

Warranty
The Caster Guy products are warranted against material defects as well as workmanship for 1 year from the original date of purchase unless the product has been abused, modified, not properly installed or used in an environment it is not intended for.

Approval must be given from The Caster Guy prior to the return of any product for warranty claims. You are responsible for all shipping charges to return the product to The Caster Guy.

If it is determined that the product is to be covered under our warranty, we reserve the right to replace the product with an equal or greater value product in place of issuing a credit. If we are replacing the product, we will pay for normal ground transportation shipping charges to the original ship to location of your order. In either event, replacement or refund of a covered warranty product, we are not responsible for shipping charges to return the product to The Caster Guy.

If the product is deemed not covered by our warranty, we will at your request, return the product to a destination you choose at your expense.

Taxes
All applicable state and local taxes will be added to your order if you live in one of the following states:
- Colorado
- Iowa
- Minnesota
- Oklahoma
- Wisconsin

Returns
The Caster Guy has a 20% restocking fee for all returned goods. Please contact us if you wish to make a return. The customer is responsible for all returned shipping charges.

Exchanges
The Caster Guy policy regarding exchanges is as follows.
We will waive the 20% restocking fee if you are returning the product you ordered in error and reordering the correct product. You are responsible for all shipping charges incurred.

Payment Terms
You have two options for payment of products purchased from The Caster Guy.

Prepayment
This is done by creating a log in on our site and using your PayPal account or our secure credit card option.

Terms
You may complete and submit our credit application for approval. Please email or fax your completed application for credit along with your tax exempt certificate, if applicable, and send to The Caster Guy by email at sales@thecasterguy.com, or you may fax it to 920-432-8065. This process takes 1-2 business days to complete. You will be contacted by one of our members with the results of your credit request. Please contact us if it has been more than 2 business days since you submitted your application and you have not been contacted by someone from The Caster Guy. Please keep in mind our hours are Monday-Friday 8AM-5PM C.S.T. and only days we are open for business are counted as days processing your application. If approved, your account will be set up on Net-30 terms. This means you will have 30 days from the date of our invoice to fully pay your balance. All accounts whose balance is unpaid for 30 days from the original invoice dates will be place on credit hold and no further purchases will be permitted until the past due balance is paid in full.
